SANGHARAJ SASANE

Software Engineer | Python, Cloud Automation & GenAI (LLM, RAG)

Mumbai, India | +91 93720 12510 | sangharajsasane99@gmail.com | linkedin.com/in/sangharaj-sasane-bb64a5307 | github.com/Sangharaj1

PROFESSIONAL SUMMARY

Software Engineer with 3+ years at NTT DATA building Python serverless automation on AWS and LLM tools using LangChain and RAG. Cut manual operational workload by 70% and analyst intervention by 60%. Also build full-stack apps with FastAPI, Spring Boot and React. Oracle Certified in Generative AI and Developer Professional.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL
GenAI / LLM: LangChain, LangGraph, RAG, ChromaDB, OpenAI GPT-4o, Google Gemini, Prompt Engineering
Backend & APIs: FastAPI, Spring Boot, REST APIs, Microservices, JWT
Cloud & DevOps: AWS (Lambda, EC2, IAM, S3, CloudWatch), Terraform, Docker, Jenkins, CI/CD, Git
Frontend: React.js, TailwindCSS
Databases: PostgreSQL, MySQL

PROFESSIONAL EXPERIENCE

Networking Managed Services Engineer L1 (Cloud Automation & GenAI focus) | NTT DATA, Mumbai | Jul 2023 – Present

- Built Python serverless automation on AWS Lambda for routine operational tasks, cutting manual workload by 70% and turnaround from hours to minutes.
- Built LangChain + Python pipelines for incident analysis and report generation, reducing analyst intervention by 60%.
- Developed and maintained REST APIs (Spring Boot, FastAPI) across 10+ microservices, sustaining 99.9% uptime.
- Managed AWS IAM access controls across 5+ production environments with zero audit findings for 4 consecutive quarters.
- Supported CI/CD with Docker and Jenkins for zero-downtime weekly releases; used CloudWatch monitoring to cut MTTR by 35%.

PROJECTS

Cloud AI Security Automation Platform | Python, AWS Lambda, LangChain, ChromaDB, Terraform | Jan 2026 – Present

- Built a tool-using LLM agent that analyzes IAM policies, flags anomalies and generates structured incident reports for 500+ daily security events.
- Designed a RAG pipeline (LangChain + ChromaDB) to retrieve policy documents and summarize incidents; now migrating to LangGraph for multi-step state handling.

AI Resume / Job-Fit Analyzer | React, FastAPI, PostgreSQL, OpenAI GPT-4o, SSE | May 2026 – Aug 2026

- Built a hybrid 60/40 scoring engine (LLM semantic analysis + keyword overlap) with missing-skills detection and AI-rewritten resume bullets.
- Added Pydantic-validated LLM output with retry logic and real-time SSE streaming for cover-letter generation; deployed on Vercel.

SmartWebAI – AI Browser Assistant | Gemini Nano, Chrome AI APIs, React, TailwindCSS | Dec 2025 – Jan 2026

- Built a Chrome extension that summarizes and answers questions about the current page using on-device Gemini Nano, with a streaming React UI.

E-Commerce Microservices Platform | Spring Boot, JWT, MySQL, React, Docker | Mar 2025 – Nov 2025

- Built auth, product catalogue and order services as separate microservices, with JWT role-based access control across 5 services and a React frontend with live cart updates.

EDUCATION & CERTIFICATIONS

- B.E. Computer Science, K.C. College of Engineering, Mumbai University | 2019 – 2023 | CGPA 8.50/10
- Oracle Cloud Infrastructure Generative AI Professional (Oct 2025)
- Oracle Cloud Infrastructure Developer Professional (Oct 2025)
- Oracle Cloud Infrastructure DevOps Professional (Oct 2025)
